ITALIAN MARBLE FLOORING
EXQUISITE CRYSTAL CHANDELIERS
MING VASES...

SO WHY SHOULD YOU
COMPROMISE
ON YOUR PLYWOOD?

Your spaces speak volumes about your good taste. Each nook and corner has been designed with care. Every exquisite piece carefully chosen and thoughtfully placed. And complementing your refined aesthetics is **PEEL Ply**: plywood made from 100% pure Burmese Gurjan wood and manufactured using hydraulic treatment and pre-press technology.

Gurjan timber imported from Myanmar is reputed for its strength and durability.

In fact, it compares favourably with teak in most strength categories and is actually 40% more resistant to shock loads. Its rich reddish-brown colour and appearance make it a natural choice for versatile furnishing applications.

Presenting PEEL Ply. The 'no-compromise' plywood.

PEEL Ply sources the best of Gurjan timber to give you 'no compromise' plywood. Come, discover the secret of some of the best homes and commercial spaces...

One of the most respected brands in this demanding industry, PEEL Ply is the first choice for discerning customers who share our obsession with quality. Stringent quality checks at every stage of production ensure that you get the best ply your money can buy! Here's how we checkmate competition...

- Core pieces arranged to ensure unmatched evenness and consistent thickness throughout the sheet.
- Seamless edge bonding which enhances the quality of the core and veneer layers.
- Superior quality glues to prevent splitting or cracking of plywood.
- Latest equipment and technology for core and veneer peeling, drying and processing. The superior veneers thus produced are consistent in dimension and quality.

One of the greatest advantages of Plywood is its sheer versatility. Plywood from PEEL Ply lends itself to so many exciting applications from doors and panels to flooring and furniture! Made of thin strips of wood assembled in alternating directions and bonded with glue to form strong, stable sheets, our Plywood is less prone to expansion and shrinkage.

Let's get technical!

Country of Origin	Myanmar (Formerly known as Burma)
Grade	WBP (Water Boiled Proof)
Raw Material	Gurjan - Calibrated Ply
Density	850 kg/CBM
Face Thickness	1.2mm
Moisture Content	8% -12%
Screw Holding Strength	Above 250 kg
Nail Holding Strength	Above 70 kg

A versatile range!

Plywood from PEEL Ply is available in a range of sizes and thickness. Our sheets come in the following sizes: 8 x 4, 7 x 4.

Durability that will stand the test of time

While offering the inherent advantages of the parent wood, Plywood's laminated structure further enhances its properties. Plywood from PEEL is made of 100% pure Burmese Gurjan wood. It is this purity that gives our plywood unmatched stability and durability. The durability of our plywood is further enhanced by the quality of the adhesives we use. Our 'No Compromise' approach is evident in the smallest detail, like the superior glues we use to bond the veneers for long-term durability.

- 100% Waterproof
- Termite/Borer Proof
- Strong immunity to moisture and micro-organisms
- High impact resistance
- Surface dimensional stability
- High strength to weight ratio
- No corrosion

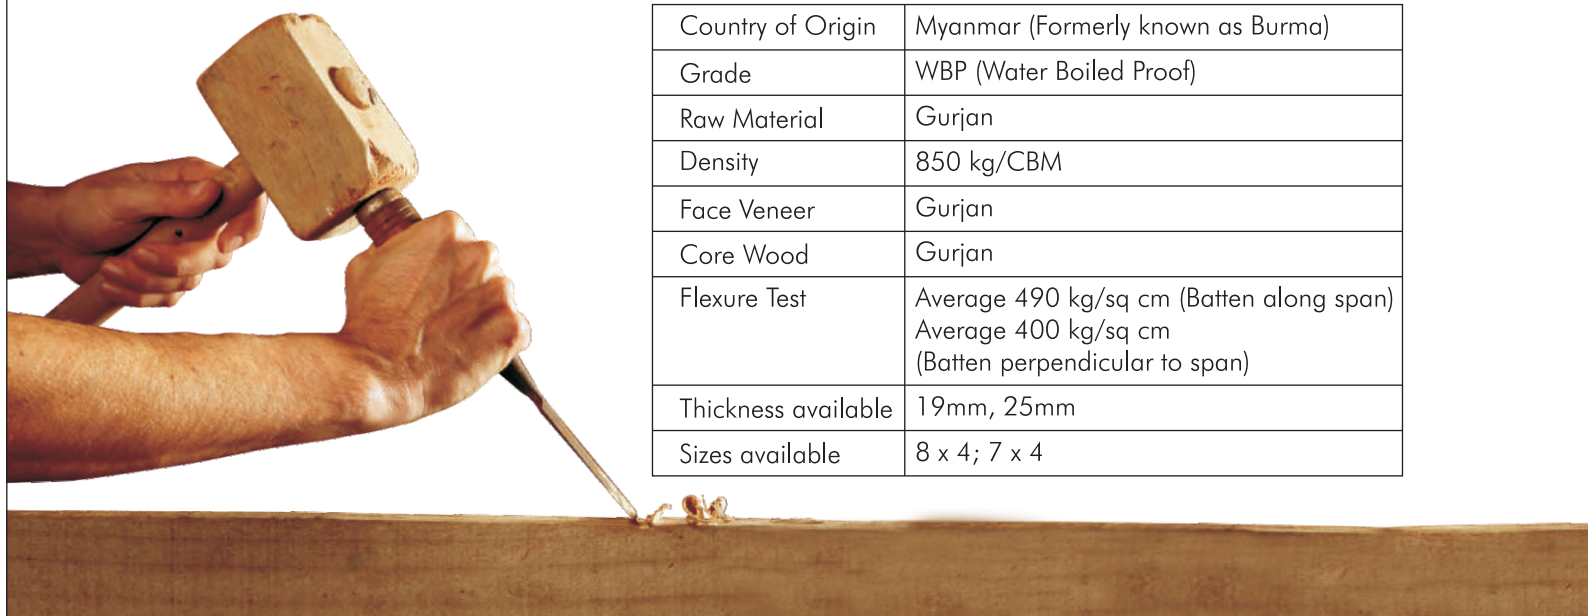

Block Boards - Ancient history meets new technology

It is believed that Egyptians used Block Boards to make furniture thousands of years ago! Today, Block Boards are the material of choice for doors, kitchen cabinets, shelves, long tables, settees, benches, partitions, bed frames and more. With fewer tendencies to sag or bend, Block Boards are preferred for applications where long pieces of wood are required or where the strength of furniture is critical. The strength of Block Boards comes from the core, which is made of solid blocks of wood, sandwiched between veneers of hardwood. This is then glued under high pressure. PEEL Ply's range of Block Boards are made from Burmese Gurjan Timber, reputed for its quality and rich looks.

Let's get technical!

Country of Origin	Myanmar (Formerly known as Burma)
Grade	WBP (Water Boiled Proof)
Raw Material	Gurjan
Density	850 kg/CBM
Face Veneer	Gurjan
Core Wood	Gurjan
Flexure Test	Average 490 kg/sq cm (Batten along span) Average 400 kg/sq cm (Batten perpendicular to span)
Thickness available	19mm, 25mm
Sizes available	8 x 4; 7 x 4

Strength that's forever!

As a company that is constantly innovating and raising the quality bar, again and again, PEEL Ply is proud to claim that our Block Boards are among the finest in India. Our Block Boards are manufactured using Burmese Gurjan timber. The technology we use of alternate join battens inside ensure zero gaps and provide excellent strength and durability to the finished product.

Block Boards from PEEL Ply come with a host of features!

- 100% Waterproof
- Termite/Borer Proof
- Strong immunity to moisture and micro-organism
- No bending, warping, corrugation or undulation
- No veneer slicing
- No default in core

Flexi Ply - shaping ideas, beautifully!

Flexible Plywood - sometimes also known as bendable plywood - is constructed from several veneers all running in the same direction. This gives it unmatched flexibility and makes it the perfect choice for curved columns, arches and any residential and commercial furniture that is a departure from straight lines. This natural product can be easily flexed by hand, without the need for any special machines. Once the flexible plywood is glued, laminated or veneered, it will hold its shape without any additional support or structure. This makes it both convenient and cost-effective.

The excellent flexibility offered by Flexi Ply from PEEL Ply has helped shape many architectural designs without compromising on its strength.

Let's get technical!

Country of Origin	Myanmar (Formerly known as Burma)
Grade	WBP (Water Boiled Proof)
Raw Material	Gurjan
Moisture Content	8% - 12%
Thickness available	4mm, 6mm, 9mm, 12mm
Sizes Available	8 x 4

Measuring up to stylish expectations!

Flexi Ply from PEEL Ply is sure to add a new, exciting dimension to your interiors. Manufactured from the finest Burmese Gurjan wood, our Flexi Ply lends itself to almost any curved contour without sacrificing its strength and stability. Like all our products, Flexi Ply too, meets the highest quality standards and comes with many excellent features.

- Ideal for complex and difficult structures
- No special structure or support needed
- 100% Waterproof
- Termite/Borer Proof
- Strong immunity to moisture and micro-organisms
- No corrugation, undulation or thickness variation
- No veneer slicing
- Zero core gaps/overlaps
